

New York Subway Diagram

by Michael S. Lopato

This map is designed to eliminate extraneous text. All route patterns are captured visually, including express service, one-way express service, skip-stop, and special rush-hour-only service.

Colors add a new layer of visual information. For each stop, the label matches the line color, with the exception of transfer stations. All labels are listed horizontally, in order to improve readability. This map is designed for use on digital devices with zoom capability.
